

Mahmoud Mzoughi

Paris, France | (+33) 7 69 12 90 39 | Email: mzoughi.mahmood@gmail.com | LinkedIn: mmzoughi

Platform Engineer building and operating cloud-native platforms that empower quantitative researchers and software engineers. Passionate about Kubernetes, platform automation, developer experience, and building reliable, scalable infrastructure across cloud and on-premises environments.

Professional Experience

Qube Research & Technologies (QRT) – Platform Engineer

01/2026 – Present | Paris, France

- Engineer, operate, and continuously improve the internal developer platform supporting more than **300 engineers** across **20+ quantitative research and engineering teams**, delivering cloud and on-premises infrastructure, developer workspaces, and shared platform services.
- Manage the deployment and lifecycle of internal applications across **development, UAT, and production** environments using **Kubernetes, Helm, Terraform**, and automated release workflows, while improving developer productivity through reusable **Terraform** modules, enhanced **Coder** templates, streamlined onboarding, and technical documentation.
- Investigate and resolve complex production issues across **AWS, Kubernetes**, developer workspaces, workload schedulers, IAM, storage, and networking, performing end-to-end root cause analysis and implementing durable solutions to improve platform stability.
- Develop **Python**-based automation and platform tooling for infrastructure maintenance, automating the cleanup of orphaned Kubernetes and cloud resources to improve platform reliability and reduce operational overhead.

Liebherr-Aerospace Toulouse SAS – DevOps Engineer (Intern)

02/2025 – 08/2025 | Toulouse, France

- Designed and automated modular **CI/CD pipelines** using **GitHub Actions, Docker**, and self-hosted **RHEL** runners, reducing application deployment time from **45 to 15 minutes** while improving deployment consistency and maintainability.
- Modernized the deployment architecture of scientific web applications by integrating **LDAPS** authentication, **TYK API Gateway**, internal artifact repositories, and secure container delivery workflows.
- Strengthened software delivery practices for aerospace applications by implementing **EN 9100**-compliant container image signing and collaborating on reusable DevOps workflows adopted across multiple projects.

Focus Corporation – Cloud Engineer (Intern)

07/2024 – 09/2024 | Tunis, Tunisia

- Evaluated and benchmarked **Sangfor HCI** and **VMware vCloud Suite** infrastructures, analyzing compute, memory, storage, and networking performance to support infrastructure architecture decisions.
- Automated virtual infrastructure provisioning and configuration using **Terraform, Ansible**, and **VMware vSphere**, reducing deployment times from hours to minutes while improving deployment consistency.

SM DEVIS RÉNOV 2.0

Tunis, Tunisia

Symfony / DevOps Engineer (Intern)

06/2023 – 08/2023

- Designed and deployed a scalable **Symfony**-based platform connecting customers with service providers.
- Introduced automated deployment pipelines using **GitLab CI/CD**, reducing deployment time from **2 hours to under 30 minutes** while increasing release frequency from weekly to daily.

Software Engineer (Intern)

01/2021 – 06/2021

- Developed a full-stack **SERN** application for quote and inventory management, reducing quote processing time by **20%**.
- Collaborated on application deployment, testing, and production support, building early experience in software delivery and automation.

Education

ESPRIT School of Engineering

09/2022 – 08/2025

Engineering Degree in Cloud Computing and IT Architecture

- Degree accredited by the **Commission des Titres d'Ingénieur (CTI)**, a member of the **Conférence des Grandes Écoles (CGE)**.

Higher School of Digital Economy (ESEN), University of Manouba

09/2018 – 09/2021

Bachelor's Degree in Applied Business Computing

- Specialization in **Electronic Commerce**.

Technical Skills

Platform Engineering:
Kubernetes, Terraform, Helm, Coder, Karpenter, GitOps, Ansible

Cloud & Infrastructure:
AWS, Docker, VMware vSphere, Linux (RHEL, Ubuntu, CentOS), Azure **AZ-900, AI-900**

CI/CD & Automation:
GitHub Actions, GitLab CI/CD, Jenkins, JFrog Artifactory,

SonarQube, **Python**, Bash

Observability & Monitoring:
Grafana, Prometheus, OpenTelemetry, ELK Stack, Jaeger

Programming:
Java, C#, JavaScript, TypeScript, .NET, Node.js

Identity & Access:
Active Directory, LDAP, Kerberos, HashiCorp Vault

Languages

Arabic - Native
English - Fluent - C2
French - Fluent - C2
